

How to migrate to the new leads integration and receive Angi leads

You will need to migrate to the new leads integration by 1/31/2023 or you will no longer be able to receive leads from Angi.

1. Log in to your [Angi leads account](#) > Navigate to the Leads Center > Open “Sync My Schedule”

2. Select the ServiceTitan option and choose to “Disable Sync.”

3. Next, follow ServiceTitan’s [onboarding instructions](#). For customers who have used the legacy (V1) integration, the new Angi integration will be available to configure under [Settings > Integrations > Marketing Integrations](#).
